

Techni NEWSLETTER

S Y S T E M S

Welcome to our latest Techni Systems newsletter.
We will look back at what's gone on since the middle of the year up until now.

CONVERSIONS

We've had plenty of vans come in over the last few months and leave our workshop with system installs and completed conversions. Here are a selection:

Contact Us For A Quote

IAA TRANSPORTATION

In mid September, our Commercial Manager Charlotte Doel, Sales Manager Ben Watts, Key Account Executives Ben Mancini and Jessica Horne, as well as our Head of Technial Janos Barany headed to Hannover, Germany to exhibit at the IAA Transportation.

It was valuable for us to be present at the event to help grow our business across Europe. Throughout the event, our team carried out over 80 demos of our system. It was also greatly beneficial to exchange ideas with fellow industry professionals from throughout the continent.

SYSTEM DEMOS

We have travelled up and down the country demoing our compressed air system. One of our visits was to a utilities company where we demonstrated how our compressed air system can be used to blow fibre optic cabling through enormous lengths of a ducting pipe.

If you would like to see what our system is like up close, book your own demo today!

Our system demos are free with no obligation and we come to you at no extra charge. Just get in touch with our team and we'll arrange a date and time that suits you.

CONVERSION SPOTLIGHTS

We recently highlighted two of our fit outs in a Conversion Spotlight. These showcase each individual item we install which gives you a great idea what we can do for your vehicle.

VIDEO SHOWCASES

We produced before/after step by step videos of two van conversions. We also produced a video which highlights the main components that make up our VR70 system. You can view them on each of our social media channels:

BLOGS

Our NEWS page on our website features our latest blogs.

Since the last newsletter, we have produced content on a range of different topics including our aftercare support service, how our air system benefits to using a skid mount and how you can become one of our installation partners. We have highlighted several sections of conversion items we are able to install for your vehicle including tyre changers, powder-coated items and safety and security items.

CONVERSION BROCHURE

Have you seen something you'd like installing inside or on the outside of your vehicle?

Everything we're able to install as part of our conversion fit outs is listed in our Conversion Brochure. You can download our Conversion Brochure to view online or we can deliver a physical copy to you at no charge!
