

Welcome to our first Techni Systems newsletter!

This newsletter will be released every quarter and has been created to share everything that has been happening here at Techni Systems within the past few months and what we have planned for the future.

NEW TECHNI SYSTEMS BROCHURE

We are pleased to share with you our brand new Techni Systems Brochure! Within this brochure you will find information on all of our engine mounted compressed air systems, our stand-alone units and our vehicle conversions. We have also included comparison tables for each system so that you can work out which system is best for your needs.

Check out our new brochure on our website [HERE!](#)

INCREASED VEHICLE CONVERSION OPTIONS

Our design team has been working hard to create lots more conversion options for our customer's vans. As well as installing your compressor systems we also offer a variety of conversion products from external & internal racking, van lining and flooring, small and large storage options, powder-coated accessories, tyre changers and wheel balancers, vehicle graphics and much more. We can work with you to design and create a completely bespoke vehicle conversion that suits your business.

BUILDING EXPANSION & GROWTH

Due to the ever-growing need for more space, we have doubled our current workshop and vehicle conversion space. In addition to our manufacturing facility, we now have a bigger vehicle workshop which can accommodate more vehicle conversions and system installs. We are also working on creating a vehicle showroom where customers can view all of our products available for our conversions, our demo vans and our systems.

ON-SITE SYSTEM DEMOS

We have had a busy few months with our on-site demos, visiting potential customers and letting them try out our system for themselves. We offer free no-obligation on-site demos so that you can put our system to the test in a real-life situation using your own tools. We will come to you, anywhere in the UK!

If you would like to book a free demo get in touch today with our sales team!

MEET THE TECHNI SYSTEMS WORKSHOP TEAM

Meet our workshop team, the guys that do all of our van conversions and system installs! Working in the workshop we have Steve Richards our workshop controller, Jevon Whittingham our Junior Product Technician, Jon Barray our Senior Product Specialist, Adrian Falat our Product Technician and James Griffiths our Apprentice Product Technician.

For Service, Warranty & Breakdown please contact Steve on 07495 043 147.

IAA 2022 HANNOVER GERMANY

Techni systems recently exhibited at the IAA transportation in Hannover, Germany. It was great to catch up with our current European dealers and to demo our system to potential dealers and customers.

We currently have over 500 systems in the field in Europe installed by our accredited dealers. At the IAA we exhibited for 7 days and performed nearly 100 demos of our system to potential customers and dealers.
